Understanding Building Management Systems

This course introduces learners to Building Management Systems (BMS) and their role in modern building operations. Through guided walkthroughs, interactive activities, readings, and assessments, learners will explore BMS interfaces, equipment monitoring, operational data, schedules, alarms, and common workflows. The course focuses on practical understanding and real-world application, helping learners build confidence in navigating BMS tools and interpreting building information. No advanced programming background is required.

Questo certificato attesta il completamento da parte dello studente di un programma online fornito da Coursera. Non costituisce un'iscrizione formale ad alcuna università o ente e non conferisce di per sé crediti accademici, voti o titoli di studio. Altri istituti o organizzazioni possono, a loro discrezione, riconoscere questo tipo di apprendimento nell'ambito dei propri programmi o credenziali.
